

We are committed to providing families with accurate and prompt information in the event of inclement weather and other urgent matters impacting our schools and community.

If weather becomes inclement during the evening/night hours, the Transportation Director and Superintendent will check the road conditions as early as 4 a.m. They will check to see if conditions are safe for buses, giving consideration to all roadways.

The Transportation Director and Superintendent will make the decision to announce either a delayed opening or school closure by approximately 5:00 a.m. New Summerfield ISD will use the following methods of communication to relay urgent information to district families:

- Blackboard parent notification system (phone calls, texts, emails)
- New Summerfield ISD website
- New Summerfield ISD Facebook page
- Local radio and TV stations

Otherwise, schools will be open as scheduled.

If winter weather conditions become worse during the school day, the district will determine if an early release is needed to get the students home sooner and bus drivers back to the bus headquarters safely prior to darkness. If an early release time is set, communication will be sent to families with pick-up and/or transportation information.
